

## **New Members in January 2009**

### **DUGEO (M) SDN BHD (157)**

Dugeo (M) is a geosciences company offering services to the global oil and gas industry across three main areas:

- **Seismic Processing and Depth Imaging** – Dugeo (M) offers a complete seismic processing and depth imaging capability starting with field tapes or data at any stage of the processing / imaging flow.
- **Quantitative Interpretation (QI) Products & Services** – with HQ experts, Dugeo (M) has the capability to manage a comprehensive QI flow which begins with depth dependent rock physics model building and stochastic forward modeling. A Bayesian based classification scheme is used to predict lithology and fluid content using the rock property volumes from seismic inversion and the modeled distributions.
- **Full Range of Integrated Petrophysical Services** – including well log editing, synthesis and interpretation.

### **2H OFFSHORE SDN BHD (158)**

2H Offshore Sdn Bhd is a consultant and services provider offering specialised services for riser design and engineering, monitoring and integrity management.
