Bulletin Issue number 10-11 November 2009

Integrated Operations Forum—POSC CEASAR
20– 21 October 2009

On October 20th 2009, PETRONAS/PCSB jointly hosted and organized an international POSC CAESAR Association Forum (PCA Forum 2009) in Kuala Lumpur at Hotel NIKKO Kuala Lumpur. The forum was attended by 84 delegates including members from MOGSC.

Invited speakers from well-known companies/organizations such as BP UK, Woodside Australia, the Norwegian Oil Industry Association, and international organizations such as FIATECH, MIMOSA and ENERGISTICS from the USA, as well as PETRONAS Carigali Sdn Bhd will share their respective initiatives towards achieving a common goal of cost saving with advance technologically developed tools, independent of software vendors to enable real-time collaboration for plant/field operations.

7th Deepwater Technology Asia Conference and Exhibition
26th October 2009

The 7th **Deepwater Technology Asia Conference and Exhibition** took off on the morning of the 26th of October 2009 amidst high expectations as the previous year's installment was an unmitigated success. The theme for the conference was "Regional Centre for Deepwater Development – An Update", bringing into focus Malaysia's role as the deepwater proponent in the Southeast Asian region.

Held on the 26th and 27th of October the conference, which PetroMin organized jointly with MOGEC (Association of Malaysian Oil and Gas Engineering Consultants) and MOGSC (Malaysian Oil & Gas Services Council) and supported by SUT (Society for Underwater Technology), was hyped to be a major event in the regional deepwater calendar due to the long-standing success of the series as well as the strength and vision of the conference's technical committee and advisors. The conference was held under the aegis of Datuk Abdullah Karim, VP, PETRONAS, MD/CEO, PETRONAS

1 EXCO Meeting,, 3rd December 2009

7th Deepwater Technology Asia Conference and Exhibition

26th October 2009

Carigali, who was the Conference Advisor, and steered by a Conference Technical Committee comprising Dr. Torkil Ganendra of Aker Solutions, Mr. Sofiyan Yahya of MOGSC, Mr. Dirk Anandel of Sarawak Shell Bhd, Ir Hj Ahmad Khairiri of PETRONAS Carigali and Mr. Zamri Yusoff of PETRONAS.

Considering the fact that the focus of the conference was on Malaysia it was fitting that the first keynote address was presented by En. Ahmad Nizam B Salleh, Vice President, Corporate Services Division, PETRONAS. The second speaker, was Prof. Andrew C Palmer, Keppel Professor, Centre for Offshore Research and Engineering, National University of Singapore.

The end of the presentation signaled the commencement of a question-and-answer session where a large number of probing questions were fielded. The session was concluded with comments from Dr. Torkil and the midday break was cued.

The lunch break proved to be an excellent opportunity for the speakers and delegates to take a closer look at the exhibitors' booths and to speak to the exhibitors. The exhibitors, AGR Petroleum Services and IDEAS Singapore Pte Ltd. had put in much effort to organise their booths and this was rewarded by the extensive interest that the booths generated.

The final session of the conference was a panel discussion of sorts. Owing to the involvement of the MOGEC and MOGSC presidents at the conference, it was possible to host the MOGSC meeting which served as the final segment. The meeting of MOGSC was clearly along the lines of the conference theme and proved to be a masterstroke. The meeting was very well-attended and the delegates were given a chance to witness firsthand the modus operandi of MOGSC as well as to be acquainted with issues that affected the Malaysian service contractors. Due to confidentiality issues the content of the meeting cannot be published.

The rapt audience was a reflection of the high-quality presentations

Keynote Speakers En. Ahmad Nizam B Salleh and Prof. Andrew C Palmer taking in the presentations

The MOGSC meeting drew very favorable response

The high level of participation from the floor was critical to the conference's suc-

Welcome New Members

CETCO OILFIELD SERVICES (M) SDN BHD, are providing unique solution for all phase of oilfield production. CETCO Oilfield Services has a solid reputation within the oil and gas industry for its dependable services and continuing technological innovation. CETCO Oilfield Services offers an array of patented technologies, production.

Major services:-

- Water Treating Equipment
- Mercury Removal
- Completion fluid Filtration Equipment & Services
- Well Completion Equipment & Services
- Pipeline Maintenance
- Coiled Tubing Unit 7 Services

Abdul Moain Mohamed
Managing Director

Thomas Bkyth
S.E.A Manager

Steven Loh Fook Cheong
Engineering Manager

Wong Cheng Perng
SR. Project Engineer

MSET Engineering Corporation Sdn Bhd

Brief on company services and activities:

Process equipment design and manufacturing for oil/gas/petrochemical plants i.e various types of Pressure Vessels (Separators, Scrubbers, Drums, Tanks, Filters), Process Columns, Heat Exchangers, Launchers & Receivers and Gas Conditioning Skids.

Commercial Director

GRAVOGRAPH is the subsidiary of Gravotech/Technifor Group (now known as Gravotech Marking SAS, France) in Malaysia, representing its brandnames – Gravograph, Technifor and Propen.

Gravotech was formerly known as Gravograph Malaysia Sdn. Bhd. incorporated in May 2001. In 2006, the company officially changed its name to gravotech after the merger of Gravograph/Technifor group in 2003 and in line with the Group's synergy exercise to create a corporate identity for its worldwide subsidiaries.

Gravotech, being a subsidiary of the group and its nature of business is to represent the brandnames of the group and to conduct sales – direct and indirect and to provide training and after sales support to our customers, resellers and dealers.
